Logo Brand Guidelines

Clear space around the logotype

The logotype always looks best when it has a large area of clear space around it.

In order to achieve this, a minimum clear space surrounding the logotype has been defined.

The clear space in the example on the right is marked in grey and it will always be with proportion to the “one” typeface height.

This space must stay clear without any type, graphic elements and high-contrast areas of photography.

As the one M2M logo must be easily recognized to be effective, the primary logotype should not be reproduced smaller than 30mm.
